

Executive Summary

Weekly Multi-Touch Marketing Attribution Report

Reporting window: Jun 22, 2026 to Jun 28, 2026 (IST)

Executive Summary

₹36,976 in paid media spend generated 19.0 attributed conversions under the U-shaped model, for a blended True CAC of ₹1,946. The model attributes 26.92 lakh of qualified pipeline and 20.51 lakh of Closed Won revenue.

Key Metrics

- Total spend: ₹36,976 across Google Ads, Meta Ads, and LinkedIn Ads.
- Attributed conversions: 19.0 across 19 included opportunities; blended True CAC: ₹1,946.
- Attributed pipeline: ₹26,92,052; attributed revenue: ₹20,51,076.
- Credit distortion: 3 materially over-credited and 10 materially under-credited Platform + Campaign Type combinations.
- Cross-platform journeys: 73.7% (14 of 19 attributable opportunities).
- Underperformance: 7 combinations met the optimization threshold and generated 7 unassigned Jira tasks.

Budget Reallocation Recommendations

Budget changes are capped at 20% of current weekly spend and are tied directly to the last-click CAC delta.

- Google Ads / ABM: raise 20% (₹493). Last-click CAC N/A versus True CAC ₹2,739 (maximum under-crediting).
- LinkedIn Ads / ABM: cut 20% (₹378). Last-click CAC ₹945 versus True CAC ₹2,100 (55.0% lower).
- LinkedIn Ads / Brand Search: raise 20% (₹152). Last-click CAC N/A versus True CAC ₹1,520 (maximum under-crediting).
- LinkedIn Ads / Display: raise 20% (₹446). Last-click CAC N/A versus True CAC ₹2,788 (maximum under-crediting).
- LinkedIn Ads / Lead Gen: raise 20% (₹384). Last-click CAC N/A versus True CAC ₹3,200 (maximum under-crediting).
- LinkedIn Ads / Prospecting: raise 20% (₹336). Last-click CAC N/A versus True CAC ₹8,400 (maximum under-crediting).
- LinkedIn Ads / Retargeting: raise 20% (₹258). Last-click CAC ₹1,290 versus True CAC ₹860 (50.0% higher).
- Meta Ads / ABM: raise 20% (₹276). Last-click CAC N/A versus True CAC ₹6,890 (maximum under-crediting).

- Meta Ads / Brand Search: raise 15% (₹101). Last-click CAC ₹670 versus True CAC ₹447 (50.0% higher).
- Meta Ads / Competitor: raise 20% (₹172). Last-click CAC N/A versus True CAC ₹4,310 (maximum under-crediting).
- Meta Ads / Display: raise 20% (₹370). Last-click CAC N/A versus True CAC ₹3,080 (maximum under-crediting).
- Meta Ads / Lead Gen: cut 20% (₹287). Last-click CAC ₹717 versus True CAC ₹1,593 (55.0% lower).
- Meta Ads / Retargeting: cut 20% (₹206). Last-click CAC ₹343 versus True CAC ₹687 (50.0% lower).

Performance Analysis

Performance Analysis

Reporting window: Jun 22, 2026 to Jun 28, 2026 (IST)

Attribution Approach

- Position-based model: 40% to first touch, 40% to last touch, and 20% evenly across middle touches; single-touch opportunities receive 100%, and two-touch opportunities split 50/50.
- Touchpoints were ordered by GA4 session timestamp. Exact Click ID matches were required against campaign exports; Contact ID fallback was used only when a missing Click ID could be resolved uniquely.
- Attributed Conversions include every attributable opportunity regardless of stage. Pipeline includes Discovery, Demo Scheduled, and Proposal only. Revenue includes Closed Won only.
- True CAC equals weekly spend divided by U-shaped attributed conversions. All source financial fields were already in INR, so no FX conversion was required.

Validation: all 19 included opportunities allocate exactly 100%; 1 opportunity with no resolved campaign touch was excluded from attribution and overlap calculations.

U-shaped Performance

Campaign-level CAC table for every Platform + Campaign Type combination with spend in the window. Composite cells retain the full requested metric set while keeping the table readable.

Total / blended: 19.0 conversions · CAC ₹1,946 · Pipeline ₹26,92,052 · Revenue ₹20,51,076
 · Distribution differs; total credit is unchanged.

Audience Overlap

73.7% (14 of 19) of attributable opportunities used two or more resolved touches spanning more than one platform.

- Google Ads + Meta Ads: 11 opportunities.
- Google Ads + LinkedIn Ads: 8 opportunities.
- LinkedIn Ads + Meta Ads: 7 opportunities.

Operations

Operations

Reporting window: Jun 22, 2026 to Jun 28, 2026 (IST)

Underperforming Campaigns and Jira Tasks

7 combinations exceeded 1.5× blended True CAC (₹2,919) or met the high-spend zero-conversion rule. Tickets are unassigned and labeled marketing-optimization.

Platform / Campaign	Spend / True CAC	Jira Task	Recommended Action
Google Ads · Display · SC Display Cloud Visibility	₹3,437 · ₹4,296	SCM-76	Hold budget; optimize path
LinkedIn Ads · Lead Gen · Enterprise Cloud Guide Lead Gen	₹1,920 · ₹3,200	SCM-77	Raise 20% (₹384)
LinkedIn Ads · Prospecting · IT Director Prospecting	₹1,680 · ₹8,400	SCM-78	Raise 20% (₹336)
Meta Ads · ABM · Enterprise CIO ABM	₹1,378 · ₹6,890	SCM-79	Raise 20% (₹276)
Meta Ads · Competitor · Compare Cloud Platforms	₹862 · ₹4,310	SCM-80	Raise 20% (₹172)
Meta Ads · Display · Future of Cloud Carousel	₹1,848 · ₹3,080	SCM-81	Raise 20% (₹370)
Meta Ads · Prospecting · Tech Leaders Prospecting	₹3,951 · ₹4,939	SCM-82	Hold budget; optimize path

Data Quality Notes

- GA4 sessions GA4-S-0014-JUN22, GA4-S-0020-JUN22, GA4-S-0026-JUN22, and GA4-S-0034-JUN22 had no Click ID and multiple paid campaign candidates under Contact ID fallback; the non-paid return sessions were excluded and logged rather than guessed.
- OPP-2020-JUN22 was excluded because gclid-SC-unresolved-003-JUN22 did not resolve to any campaign row, leaving the opportunity with no resolved paid marketing touches.
- The CRM source exposed Opportunity Name plus first/last paid Click IDs rather than Account Name plus a semicolon-separated Touchpoint Click ID list. Timelines

therefore used ordered GA4 opportunity sessions and reconciled the CRM first/last IDs.

- No source email or phone PII was detected. No redaction substitutions were required.
- All monetary source columns were already in INR; the FX table was not invoked.

Run Summary

- Status: Complete.
- Data processed: 37 paid campaign rows, 45 GA4 sessions, and 20 qualifying CRM opportunities; 19 opportunities were attributable and one was excluded with a data-quality note.
- Validation: 19 of 19 included opportunity allocations sum to 100%; all 21 Platform + Campaign Type combinations with spend appear in both the U-shaped and last-click table sets; no placeholder text remains.
- Jira: 7 optimization tasks created in SCM, SCM-76 through SCM-82; all are unassigned and labeled marketing-optimization.
- Teams: the last 20 channel messages were checked, no matching prior notification was found, and exactly one message was sent (message ID 1785834812880).
- Report location: Weekly Attribution Reports - Solstice Cloud.
