Weekly Multi-Touch Attribution Report

Solstice Cloud | Executive Summary

Reporting window: Jun 22, 2026 to Jun 28, 2026 (Asia/Kolkata)

Executive Summary

Verified weekly spend across Google Ads, Meta Ads, and LinkedIn Ads totaled ₹36,976.00, generating 19.00 position-based attributed conversions at a blended true CAC of ₹1,946.11. The model attributed ₹26,92,052.00 in qualifying open pipeline and ₹20,51,076.00 in Closed Won revenue.

3 platform/campaign-type combinations are materially over-credited by last-click reporting and 10 are materially under-credited. 7 combinations exceeded the 1.5× blended-CAC underperformance threshold; one opportunity with no resolvable campaign touch was excluded.

Budget Controls

All recommended reallocations are 15% of the combination's current weekly spend and remain below the 20% maximum. Underperforming combinations also require targeting, creative, landing-page, and conversion-quality optimization.

Performance Analysis

Performance Analysis

Attribution Approach

Reporting scope includes all three ad-platform exports, GA4 sessions, CRM opportunities created during the completed reporting week, and earlier opportunities that closed during that week. Campaign matches use exact click IDs; GA4 timestamps order paid marketing touches, and contact-based fallback is allowed only when a missing session click ID can be matched unambiguously to a campaign.

Position-based U-shaped attribution assigns 40% to the first touch, 40% to the final touch, and 20% equally across intervening touches. Single-touch opportunities receive 100%; two-touch opportunities split 50% / 50%. Attributed conversions include all stages. Pipeline includes Discovery, Demo Scheduled, and Proposal only; revenue includes Closed Won only. Spend, pipeline, revenue, and CAC are reported in INR.

Attribution Validation

19 resolved opportunities each allocate exactly 100% of credit. One opportunity (OPP-2020-JUN22) has no resolved marketing touch and is excluded. The campaign table contains all 21 Platform + Campaign Type combinations with in-window spend; total attributed conversions reconcile to 19.00.

Data Quality Notes

- CRM Opportunities has no semicolon-separated Touchpoint Click IDs field; complete timelines were reconstructed from GA4 session click IDs plus CRM First Touch Click ID and Last Touch Click ID.
- Ad platform exports do not include Ad Group / Ad Set; campaign-level Platform + Campaign Type reporting remains available.

- GA4 Sessions does not contain a Channel Grouping column; source and medium were used to interpret session context.
- OPP-2003-JUN22: GA4 labels Click ID gclid-SC-unresolved-001-JUN22 unresolved, but an exact in-window ad-export Click ID match resolves it deterministically.
- OPP-2008-JUN22: Click ID fbclid-SC-0630-103-JUN22 maps to ad-export Contact ID CNT-1003-JUN22 but GA4/CRM Contact ID CNT-1008-JUN22; campaign was matched by exact Click ID.
- OPP-2010-JUN22: Click ID fbclid-SC-0701-105-JUN22 maps to ad-export Contact ID CNT-1014-JUN22 but GA4/CRM Contact ID CNT-1010-JUN22; campaign was matched by exact Click ID.
- OPP-2012-JUN22: Click ID liclid-SC-0703-207-JUN22 maps to ad-export Contact ID CNT-1006-JUN22 but GA4/CRM Contact ID CNT-1012-JUN22; campaign was matched by exact Click ID.
- OPP-2014-JUN22: GA4 labels Click ID gclid-SC-unresolved-002-JUN22 unresolved, but an exact in-window ad-export Click ID match resolves it deterministically.
- OPP-2015-JUN22: Click ID gclid-SC-0703-010-JUN22 maps to ad-export Contact ID CNT-1008-JUN22 but GA4/CRM Contact ID CNT-1015-JUN22; campaign was matched by exact Click ID.
- OPP-2017-JUN22: Click ID fbclid-SC-0703-109-JUN22 maps to ad-export Contact ID CNT-1009-JUN22 but GA4/CRM Contact ID CNT-1017-JUN22; campaign was matched by exact Click ID.
- OPP-2019-JUN22: GA4 labels Click ID fbclid-SC-unresolved-101-JUN22 unresolved, but an exact in-window ad-export Click ID match resolves it deterministically.
- OPP-2019-JUN22: Click ID gclid-SC-0705-013-JUN22 maps to ad-export Contact ID CNT-1011-JUN22 but GA4/CRM Contact ID CNT-1019-JUN22; campaign was matched by exact Click ID.
- OPP-2020-JUN22: Click ID gclid-SC-unresolved-003-JUN22 could not be resolved to any in-window campaign and was excluded.
- OPP-2020-JUN22: no resolved campaign touches; excluded from attribution, audience overlap, and attribution-total validation.
