prompt_version	drift_rating	change_summary
support-v4	canonical	Canonical: most recently modified prompt version (2026-07-18T10:04:00Z).
support-v3	meaningfully diverged	Omits canonical requirement to always include the customer's next best action; empathy, one clarifying question, and billing-dispute human routing remain.
support-v2	meaningfully diverged	Changes empathetic Support Copilot into a concise FAQ bot; suppresses human escalation unless explicitly requested, removing mandatory billing-dispute routing, clarifying-question guidance, and next-best-action output.
support-v4	identical	Identical to canonical after whitespace normalization.
receipt-v6	canonical	Canonical: most recently modified prompt version (2026-07-18T10:06:00Z).
receipt-v4	meaningfully diverged	Changes extraction contract: omits currency, purchased_at, and line_items; adds tax, date, confidence, and null-when-uncertain behavior.
thread-summary-v3	canonical	Canonical: most recently modified prompt version (2026-07-18T10:09:00Z).
thread-summary-v2	minor drift	Uses 'thread' instead of 'conversation', colon-separated labels, and 'next step' instead of 'next action'; the four requested summary fields and intent remain equivalent.
thread-summary-v2-web	meaningfully diverged	Adds a 120-word maximum that materially changes the required summary output constraint; canonical mobile prompt has no length cap. This version is separately flagged for its retired Claude target on Model Pattern Check.

prompt_version	drift_rating	change_summary
vendor-copy-v1	single-source	Only observed in FlutterFlow export; no cross-platform source exists.

serving_current_code	production_traffic	production_alignment_note
Yes	188	188 production invocations served support-v4; log code markers: current.
No	412	DEPLOYMENT MISMATCH: 412 production invocations served support-v2, while pinned repository code is support-v3; log code markers: support-v3.
No observed production traffic	0	No observed production traffic for this platform/family during the UTC window.
Yes	21	21 production invocations served support-v4; log code markers: current.
Yes	96	96 production invocations served receipt-v6; log code markers: current.
Yes	17	17 production invocations served receipt-v4; log code markers: current.
No observed production traffic	0	No observed production traffic for this platform/family during the UTC window.
Yes	33	33 production invocations served thread-summary-v2; log code markers: current.
Yes	7	7 production invocations served thread-summary-v2-web; log code markers: current.

deprecated_pattern

No deprecated prompting workaround detected in the pinned prompt text.

No deprecated prompting workaround detected in the pinned prompt text.

No deprecated prompting workaround detected in the pinned prompt text.

No deprecated prompting workaround detected in the pinned prompt text.

Manual JSON-only workaround: "Return valid JSON only, no markdown" despite native schema-enforced Structured Outputs support.

No deprecated prompting workaround detected in the pinned prompt text.

Targets the Claude Sonnet 3.5 family, whose documented snapshots retired on 2025-10-28 on Anthropic-operated platforms; direct requests to retired models fail.

Targets the Claude Sonnet 3.5 family, whose documented snapshots retired on 2025-10-28 on Anthropic-operated platforms; direct requests to retired models fail. Logs still report this alias for 33 invocations.

Targets the Claude Sonnet 3.5 family, whose documented snapshots retired on 2025-10-28 on Anthropic-operated platforms; direct requests to retired models fail. Logs still report this alias for 7 invocations. This version is separately meaningfully diverged in wording/output format.

No deprecated prompting workaround detected in the pinned prompt text.

recommendation

Use high-authority instructions/system or developer messages for persistent behavior; native Structured Outputs are supported when a machine-readable response is needed. Message guidance: <https://developers.openai.com/api/docs/guides/text>

Use high-authority instructions/system or developer messages for persistent behavior; native Structured Outputs are supported when a machine-readable response is needed. Message guidance: <https://developers.openai.com/api/docs/guides/text>

Use high-authority instructions/system or developer messages for persistent behavior; native Structured Outputs are supported when a machine-readable response is needed. Message guidance: <https://developers.openai.com/api/docs/guides/text>

Configure strict JSON Schema Structured Outputs for ReceiptExtraction; remove the manual JSON-only/no-markdown workaround while preserving canonical extraction fields. Handle refusals/incomplete responses.

Native strict JSON Schema Structured Outputs are supported wherever receipt responses require a machine-readable contract; this prompt contains no manual JSON-only workaround.

Migrate to Anthropic's recommended active replacement claude-sonnet-4-6; use the Messages API top-level system field for instructions applying from the first turn. Message format source: <https://platform.claude.com/docs/en/api/messages/create>

Migrate to Anthropic's recommended active replacement claude-sonnet-4-6; use the Messages API top-level system field for instructions applying from the first turn. Investigate actual provider routing/model identity or stale log labeling; partner schedules can differ. Message format source: <https://platform.claude.com/docs/en/api/messages/create>

Migrate to Anthropic's recommended active replacement claude-sonnet-4-6; use the Messages API top-level system field for instructions applying from the first turn. Investigate actual provider routing/model identity or stale log labeling; partner schedules can differ. Keep the 120-word-cap wording fix separate. Message format source: <https://platform.claude.com/docs/en/api/messages/create>

status_note

Completed; 3 retired Claude targets; Python support deployment lag affected 412 calls. Additional security advisory: RLS disabled on public.request_logs and public.llm_call_logs.

Completed; 1 deprecated JSON-only workaround plus 3 retired Claude model targets; Python support deployment lag affected 412 calls. Previous same-window Teams message 1785838119078 was deleted, so replacement 1785841257441 was sent. Security advisory: RLS is disabled on public.request_logs and public.llm_call_logs.

Completed rerun; 1 manual JSON-only workaround and 3 retired Claude target flags. Python support deployment lag affected 412 calls. Duplicate notification skipped because channel history identifies same-window replacement 1785841257441 recorded by the prior Run Log; connector returned an empty body and Chrome opened only the Teams launcher, so body content could not be independently re-read. Security advisory: RLS disabled on public.request_logs and public.llm_call_logs.
