2026-07-22 E-LI-20260722-01	Platform engineering isn't a team you hire, it's a product you ship to your own customers here's what treat Platform engineers @PlatformEngine	2026-07-22 11:02	Seed row for test InSilo	Contrarian hook plus short paragraph @Published		https://www.linkedin.com/company/kashyap-empiro-09989841a/feed?pageid=1	2026-07-22 11:02	Yes
	Recent AI security-evaluation incidents show the risk: an agent can be told it is isolated while a network path Before an autonomous workflow gets tools, platform teams should make four controls routine: • Detail every external LLM call, specifying exactly which synthetic targets • Issue chain-level, environment-scoped credentials with no-path live systems. • Observe DDoS, cognate and sensitive actions, and audit the can-whisper policy is breached. • Rebuild and tear down test environments from code, then verify isolation in CI. The takeaway: test the agent aggressively, but make the boundary around it predictable, observable and ext

2026-08-03	EI-LI-20260803-01	LinkedIn publish initially failed: the correct Kashyap Empiric profile composer opened, but supported bulk text-entry attempts left the content editor blank and Post disabled. A short failure heads-up was delivered through the Teams connector to testing client workflows → Marketing under subject #linkedin-approvals — EI-LI-20260803-01 at 2026-08-03 16:02 Asia/Kolkata. Resolved on retry: the draft was entered through the supported keyboard path, published successfully at 2026-08-03 16:09:42 Asia/Kolkata, and verified at https://www.linkedin.com/feed/update/urn:li:share:7489993392001638400/ . The Gmail publication notice and Teams success heads-up were sent.	Resolved
