

Request	Filed	Engineer	Target project
RQ-2101	06 Jul 2026	Nele Vandersteen	brackwater-config
RQ-2102	06 Jul 2026	Callum Devereux	brackwater-config
RQ-2103	07 Jul 2026	Yusuf Karam	ravensgill-index
RQ-2104	08 Jul 2026	Tobias Lindqvist	kirkwall-batch
RQ-2105	08 Jul 2026	Marta Oyelaran	pellworth-gateway
RQ-2106	09 Jul 2026	Joachim Reuter	lindworth-cache
RQ-2107	09 Jul 2026	Sunita Iyer	garrowby-router
RQ-2108	10 Jul 2026	Hiroshi Tanabe	garrowby-router
RQ-2109	13 Jul 2026	Priya Sundaram	stanhope-retry
RQ-2110	14 Jul 2026	Yusuf Karam	dunmorton-yaml

What the change does	Lines changed
Adds a null check so an empty config file comes back as an empty result instead of throwing	12
Adds a writer that renders a parsed config back out to disk, with tests	940
Fixes the stemmer so hyphenated words index as one token	34
Fixes a race where two workers can both claim the same job after a heartbeat times out	6
Fixes the config loader so a missing timeout falls back to the default instead of zero	8
Adds a second eviction policy, least frequently used, alongside the one that is already there	120
Adds a retry on the subscriber callback when it comes back with a transient error	45
Adds metrics counters for messages dropped per topic	60
Adds jitter to the backoff so retries from lots of clients stop landing at the same moment	60
Fixes an off-by-one when a document ends without a trailing newline	9

Patch	Engineer's note
patches/RQ-2101.patch	Tiny thing, probably did not need to ask, but the handbook said file it so here it is.
patches/RQ-2102.patch	This is a fair amount of code, took me most of a sprint. Happy to answer questions on any of it.
patches/RQ-2103.patch	We hit this in production last month and upstream have been asking for it for a while.
patches/RQ-2104.patch	Six lines, it is a lock ordering thing. Nothing clever in it.
patches/RQ-2105.patch	Small one. A zero timeout meant every request failed instantly, took us a week to find.
patches/RQ-2106.patch	I signed their contributor agreement myself last month so the paperwork side should be sorted.
patches/RQ-2107.patch	Straightforward. We are already contributing there so this should be quick.
patches/RQ-2108.patch	I have done this before at Halvard so the agreement side is already in place for me.
patches/RQ-2109.patch	Backoff was too aggressive under load, this smooths it out.
patches/RQ-2110.patch	Found it while debugging something else.

Subject matter

Adjusting a per-client request allowance up and down from the latency observed downstream

Removing duplicate entries from a write-ahead log by content hash before it is replicated

Ordering batch work across a cluster by predicted completion time rather than by arrival order

Spreading repeated attempts from many clients by drawing each wait at random from a range whose top moves with the previous wait

Placing copies of data across failure domains from a live map of the topology

Matching a free-text address against a reference list by phonetic similarity

Tobias Lindqvist, Marta Oyelaran, Hiroshi Tanabe

Sunita Iyer, Ravi Menon

Notes

Upstream takes patches with no agreement at all.

Upstream takes patches with no agreement at all.

Joachim Reuter signed the individual agreement in his own name on 14 Jun 2026. Nothing corporate is executed for this project.

Upstream takes patches with no agreement at all.

Nothing executed.

Upstream takes patches with no agreement at all.

Project	Repo	Added
brackwater-config	brackwater/brackwater-config	04 Feb 2023
kirkwall-batch	kirkwall/kirkwall-batch	19 Sep 2023
pellworth-gateway	pellworth/pellworth-gateway	21 Nov 2023
garrowby-router	garrowby/garrowby-router	02 Sep 2025
lindworth-cache	lindworth/lindworth-cache	07 Jan 2024
stanhope-retry	stanhope/stanhope-retry	12 Aug 2024

Notes

We ship it in four services.

Runs our overnight jobs.

Front door on the public API.

Added when the corporate agreement went in.

Used in the pricing path.

Vendored into most of our clients.
