Consolidate Onto / Retain	Est. Annual Saving (USD)	Jira / Record	Policy Basis / Reason
Retain Jira		Retained standard; no 0 ticket	Policy §§2,3: Jira is the Project Management standard and must be retained. Identity usage is 112, leaving 8 spare seats.
Jira		6240 ITOPS-46	Policy §§2-8: Identity usage 2; annualised cost USD 6,240. With Trello, 5 source users fit Jira's 8 spare seats; group saving USD 7,740. Renewal 2026-08-09 is inside the inclusive 21-day freeze, so action is deferred to next cycle.
Jira		1500 ITOPS-46	Policy §§2-8: Identity usage 3; annualised cost USD 1,500. With Asana, 5 source users fit Jira's 8 spare seats; group saving USD 7,740. Renewal 2026-08-12 is inside the inclusive 21-day freeze, so action is deferred to next cycle.
Retain ClickUp — out of scope	N/A — policy prohibits calculation	Logged: out of scope; no ticket	Policy §1: used for client project portals with external client access. Keep out of scope; do not treat as a consolidation candidate or target.
Microsoft Teams		34200 ITOPS-45	Policy §§2-5,7,9: fresh Q3 quote USD 34,200; Identity usage 291. Teams has 95 spare seats; 196 incremental seats cost USD 0 because bundled. Higher risk: company-wide migration of 291 users.
Retain Microsoft Teams		Retained standard; no 0 ticket	Policy §§2,4: Microsoft Teams is the Communication standard and must be retained; bundled cost is USD 0. Identity usage is 205, leaving 95 spare seats.
Retain Discord — out of scope	N/A — policy prohibits calculation	Logged: out of scope; no ticket	Policy §§1,3: public developer community with external users is out of scope. “External (not in SSO)” is not evidence of waste.
Retain Harvest		Retained standard; 0 renewal freeze logged	Policy §§2,8,9: Harvest is the Time Tracking standard and must be retained. Identity usage 56 leaves 4 spare seats. Renewal 2026-08-19 is exactly 21 days from review and frozen; it also feeds client billing, a higher-risk condition.
Harvest		6000 ITOPS-47	Policy §§2-5,7,9: fresh Q3 quote USD 6,000; Identity usage 4 fits Harvest's 4 spare seats, so no incremental cost. Higher risk because the target feeds client billing.
OneDrive		5400 ITOPS-48	Policy §§2-5,7,9: annual cost USD 5,400; Identity usage 2 fits OneDrive's 60 spare seats, so no incremental cost. Higher risk: 8 TB archive exceeds the 1 TB data-migration threshold.

Retain Box — out of scope	N/A — policy prohibits calculation	Logged: out of scope; no ticket	Policy §1: platform-tied legal/compliance retention is out of scope. Executed contracts are under legal retention hold. Policy §§2,4: OneDrive is the File Storage standard and must be retained; bundled cost is USD 0. Identity usage 240 leaves 60 spare seats. Policy §§2,11: category is Design, but the policy names no sanctioned Design target. Do not guess a target, overlap, or saving. Policy §§2,11: category is Design, but the policy names no sanctioned Design target. Do not guess a target, overlap, or saving, even though usage is low. Policy §§4,10: Whiteboarding is complementary to UI design and is not duplicate spend. Q3 quote EUR 4,000 converts to USD 4,320 for spend analysed; saving is USD 0. Policy §§3,10: web/marketing analytics is complementary to in-product analytics, so this is not duplicate spend. External (not in SSO) is not evidence of waste. Policy §10: in-product analytics is complementary to web/marketing analytics, so this is not duplicate spend. Identity usage is 18. Policy §§2,3: HubSpot is the CRM standard and must be retained. Identity usage is 3, leaving 12 spare seats. Policy §§2-7: Identity usage 7 fits HubSpot's 12 spare seats; annualised Pipedrive cost and saving are USD 2,880. Below the USD 3,000 Jira threshold, so record on tracker only. Policy §11: Category is blank. A sanctioned target, overlap, and saving cannot be determined without the category; do not guess.
