Consolidate Onto / Retain	Est. Annual Saving (USD)	Jira / Record	Policy Basis / Reason
Jira		\$0 Retained — no ticket	Sanctioned Project Management standard; never retire. Identity active users 112 of 120 licences, leaving 8 spare seats.
Jira	\$6,240	ITOPS-53	Asana annualised USD 6,240. Identity users 2; grouped with Trello (3) onto Jira. Group 5 users fit 8 spare Jira seats, so group saving USD 7,740. Renewal 9 Aug (11 days) is frozen; defer migration/cancellation action to next cycle.
Jira	\$1,500	ITOPS-53	Trello annualised USD 1,500. Identity users 3; grouped with Asana (2) onto Jira. Group 5 users fit 8 spare Jira seats, so group saving USD 7,740 and threshold is tested on group. Renewal 12 Aug (14 days) is frozen; defer migration/cancellation action to next cycle.
ClickUp		\$0 Out of scope — no ticket	Client project portals with external/client access. Policy excludes this tool and forbids naming it as a consolidation candidate or target.
Microsoft Teams	\$34,200	ITOPS-54	Fresh Q3 quote USD 34,200 annual overrides tracker. Identity users: Slack 291; Teams 205 of 300, 95 spare. Positive remainder 196 seats; bundled Teams has USD 0 incremental seat cost. Company-wide ≥100-user migration is higher risk.
Microsoft Teams		\$0 Retained — no ticket	Sanctioned internal Communication standard; never retire. Bundled USD 0. Identity active users 205 of 300 licences, leaving 95 spare seats.
Discord		\$0 Out of scope — no ticket	Public developer community with external users is excluded. “External (not in SSO)” is not evidence of waste; free cost is USD 0.
Harvest		Retained; related ITOPS-55 \$0	Sanctioned Time Tracking standard; never retire. Identity users 56 of 60, leaving 4 spare. Feeds client invoices (higher risk). Renewal 19 Aug is exactly 21 days from review, within inclusive freeze; migration/cancellation action deferred to next cycle.
Harvest	\$6,000	ITOPS-55	Fresh Q3 quote USD 6,000 annual overrides tracker. Identity users 4 fit Harvest's 4 spare seats; incremental cost USD 0. Target feeds client billing (higher risk); target's 19 Aug renewal is within inclusive freeze, so migration/cancellation action is deferred to next cycle.

OneDrive	\$5,400	ITOPS-56	Annual cost USD 5,400. Identity users 2 fit OneDrive's 60 spare seats (300 licences less 240 active); bundled target has USD 0 incremental cost. The 8 TB archive exceeds 1 TB and is higher risk.
Box	\$0	Out of scope — no ticket	Executed contracts under platform-tied legal retention hold. Policy excludes legal/compliance retention; do not name as candidate or target.
OneDrive	\$0	Retained — no ticket	Sanctioned File Storage standard; never retire. Bundled USD 0. Identity active users 240 of 300 licences, leaving 60 spare seats.
Unresolved — no sanctioned Design target		Unresolved — no ticket	Design is not among policy category standards. A sanctioned target is missing; do not infer Figma as standard, overlap, or saving.
Unresolved — no sanctioned Design target		Unresolved — no ticket	Design has no sanctioned target in policy. Vendor discontinuation and low identity usage (1) do not authorise guessing a target, overlap, or saving.
Miro	\$0	Recorded — complementary; no ticket	Policy says Whiteboarding is complementary to UI design, not duplicate spend. Fresh Q3 quote is EUR 4,000 annual = USD 4,320 for total spend, but no consolidation saving.
Google Analytics 4	\$0	Recorded — complementary; no ticket	Web/marketing analytics is complementary to in-product analytics, not duplicate spend. Free USD 0; “External (not in SSO)” is not evidence of waste.
Mixpanel	\$0	Recorded — complementary; no ticket	In-product analytics is complementary to web/marketing analytics under policy; not duplicate spend. Retain and do not infer an Analytics standard.
HubSpot	\$0	Retained — no ticket	Sanctioned CRM standard; never retire. Identity active users 3 of 15 licences, leaving 12 spare seats.
HubSpot	\$2,880	Recorded — below USD 3,000; no ticket	Annualised USD 240 monthly × 12 = USD 2,880. Identity users 7 fit HubSpot's 12 spare seats, so incremental cost USD 0. Saving is below ticket threshold.
Unresolved — category and target missing		Unresolved — no ticket	Tracker Category is blank and policy supplies no sanctioned target for async video. Do not guess category, target, overlap, or saving.
